

Developing immunity: IT security in the era of remote working webinar, Thursday 18 June 2:00pm BST

Speaker

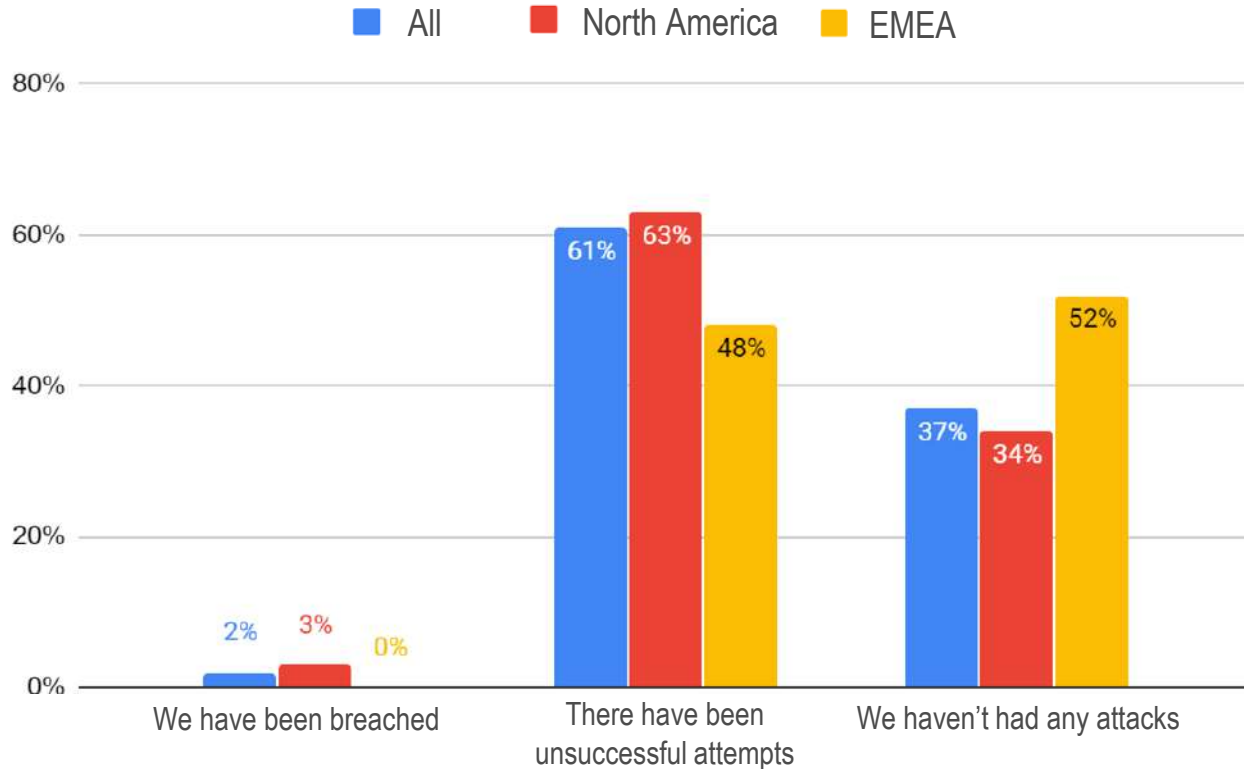

Paul Edon, Director – International Services, Tripwire

Agenda

- » A new wave of Covid-19 related attacks
- » The three main culprits
 - » Phishing
 - » Malware
 - » VPN
- » Protecting your remote assets
- » Training and Support for the remote employee
- » How close was the survey?
- » Q&A

COVID-Related Attacks - North America and EMEA

Phishing

Malware

The Virtual Private Network

VPN services have been pushed to the forefront

Protecting remote assets

You can't protect it, if you don't know it's there

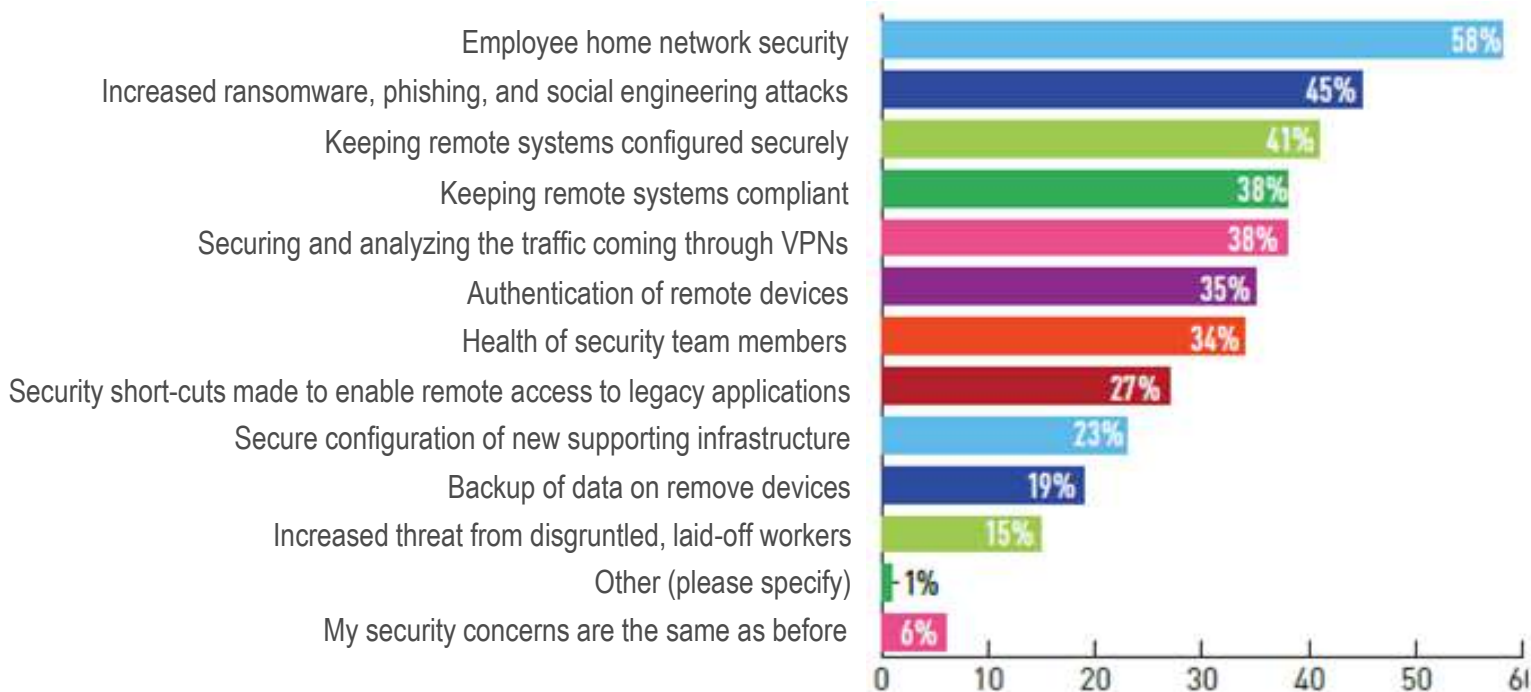

Training and Support for the Remote Employee

Training remains critical – people are your weakest link

Details Matter – How close was the survey?

What areas of your company's security are you **more** concerned about now than you were before COVID-19? Choose all that apply.

Questions and Answers
