Google. Done right.

cts

Google. Done right.

**By 2025, more than
a quarter of data
created in the global
datasphere will be
real time in nature**

Digital devices/connected industry

Next-gen manufacturing, industrial sensors, smartphones, wearables, cars/navigation

Digital commerce

Online interactions, purchase histories, clickstreams, advertising, inventories, ledgers

Digital communications

Social media posts, photos, email, collaboration platforms, chat boards, B2B/B2C outreach

Digital media consumption

Newspapers, magazines, videos, games, television, movies

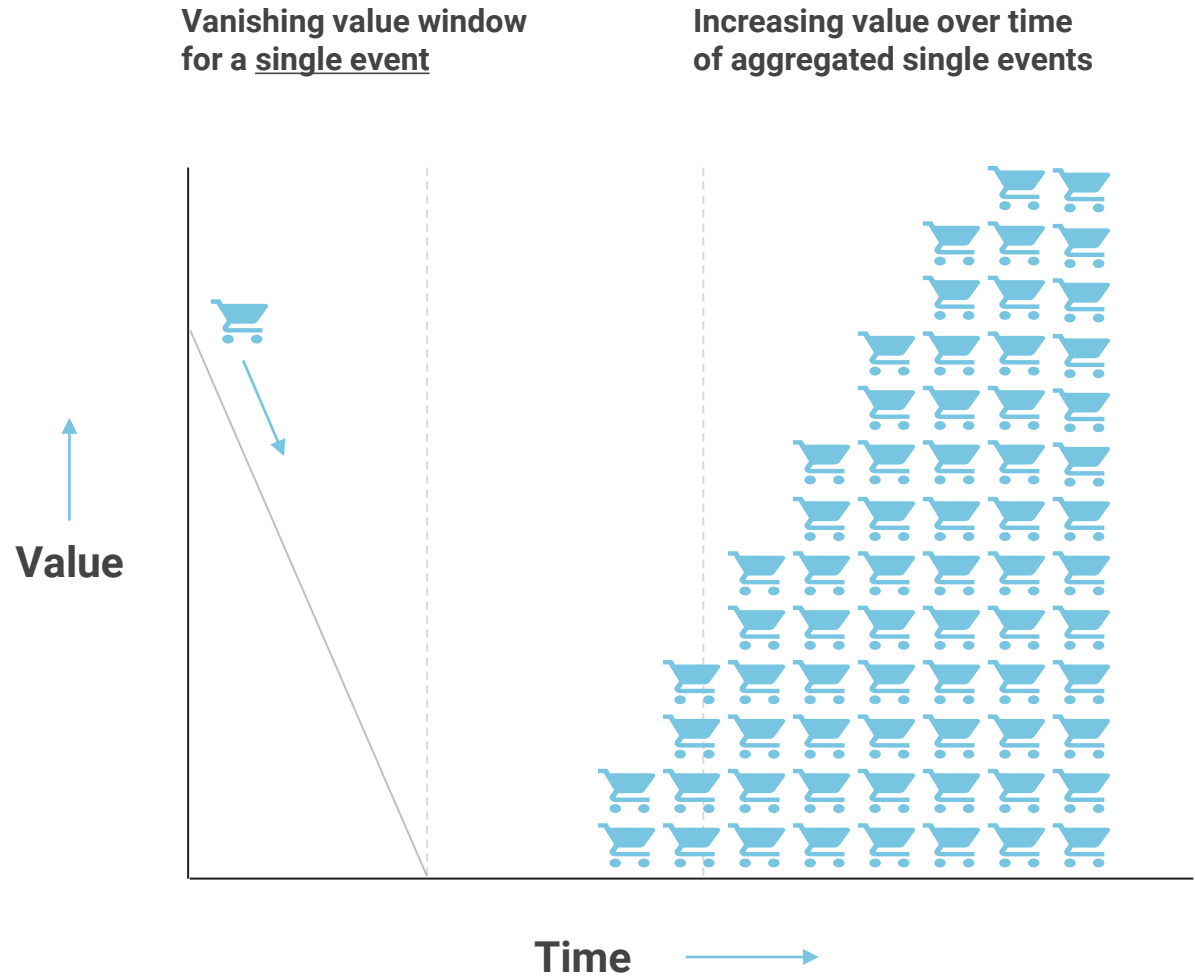

The need for speed

Speed of analytics

Systems must be able to ingest, process, and serve data in real-time - **or opportunities are lost**

Speed of action

Systems must be able to use logic or Machine Learning to make instant decisions - **or the window of value for an event vanishes**

How can we help?

Start a Google inspired transformation

Transformation Workshop

(Seeking great challenges to solve for)

Hackathons

(Solving a specific business problem)

Innovation Accelerators

(Proving a specific concept or technology)

Bring it to life and get it done right

Spark
High Velocity Migrations
Training & Enablement

(Migration and modernisation of your apps / infra plus importantly getting your team ready to go)

Enable
Operational Efficiency
with Data & ML

(Leveraging Google and Looker's data & ML capabilities to help you be more productive with data experiences / apps)

Empower
Google Workspace Deployed
Get Off of Microsoft!
No Code Development

(Embrace and get the most from Google Workspace to empower your workforce talent)

Help you sustain and iteratively improve

Managed Services for GCP Managed Services for Google Workspace

As an accredited Google MSP, CTS can help support both GCP and Workspace, ensuring you get the most from your deployments, it's secure and well governed and you've getting good value for money.
