Pre-pandemic: health trends

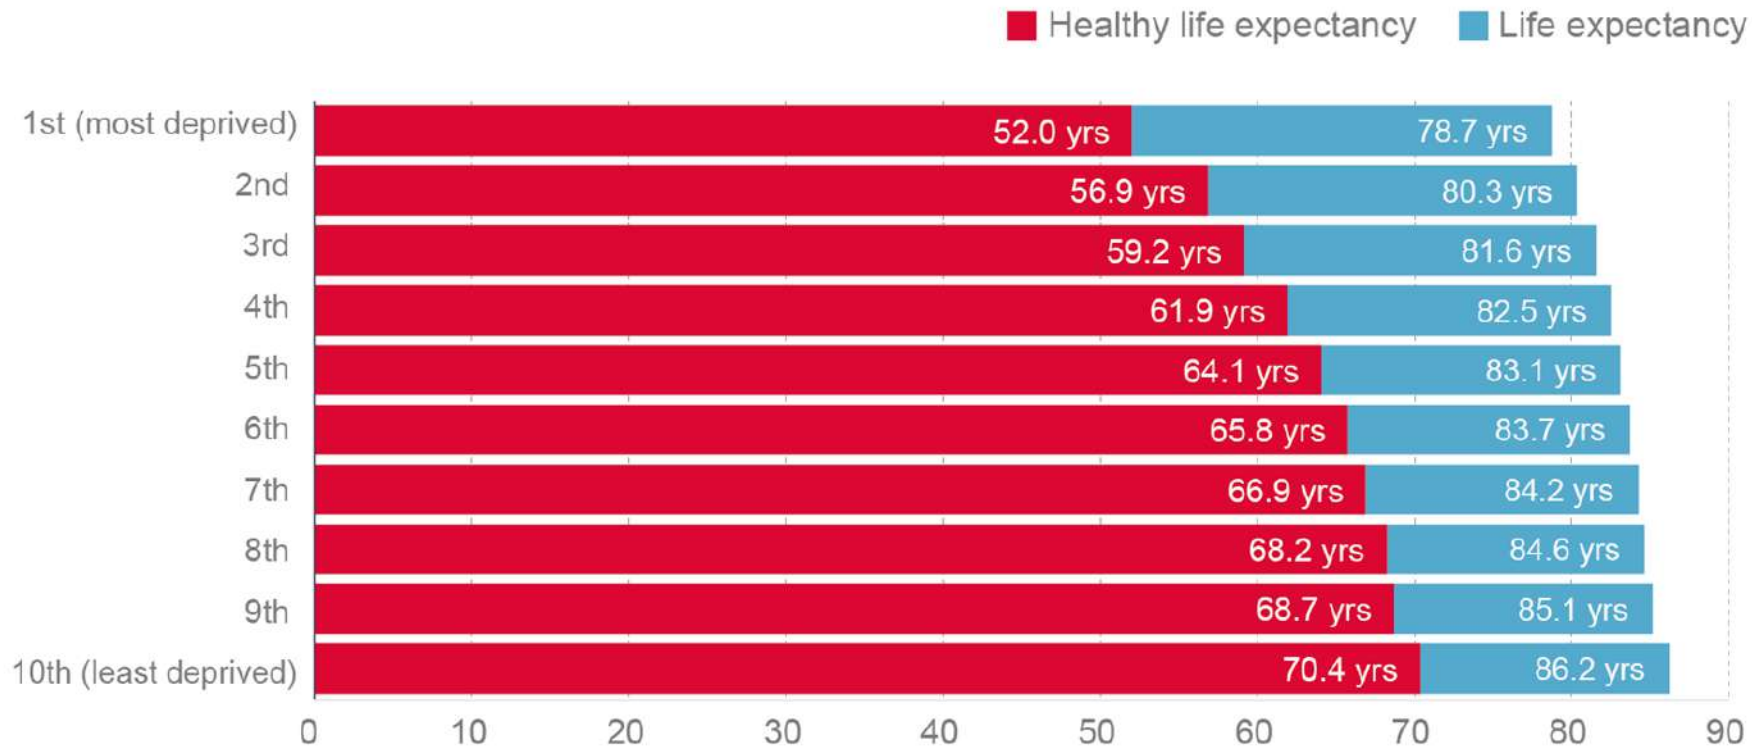

The changed trend in mortality rate improvements: England and Wales, 2000–2018

Pre-pandemic: health inequalities

Female life expectancy and healthy life expectancy at birth

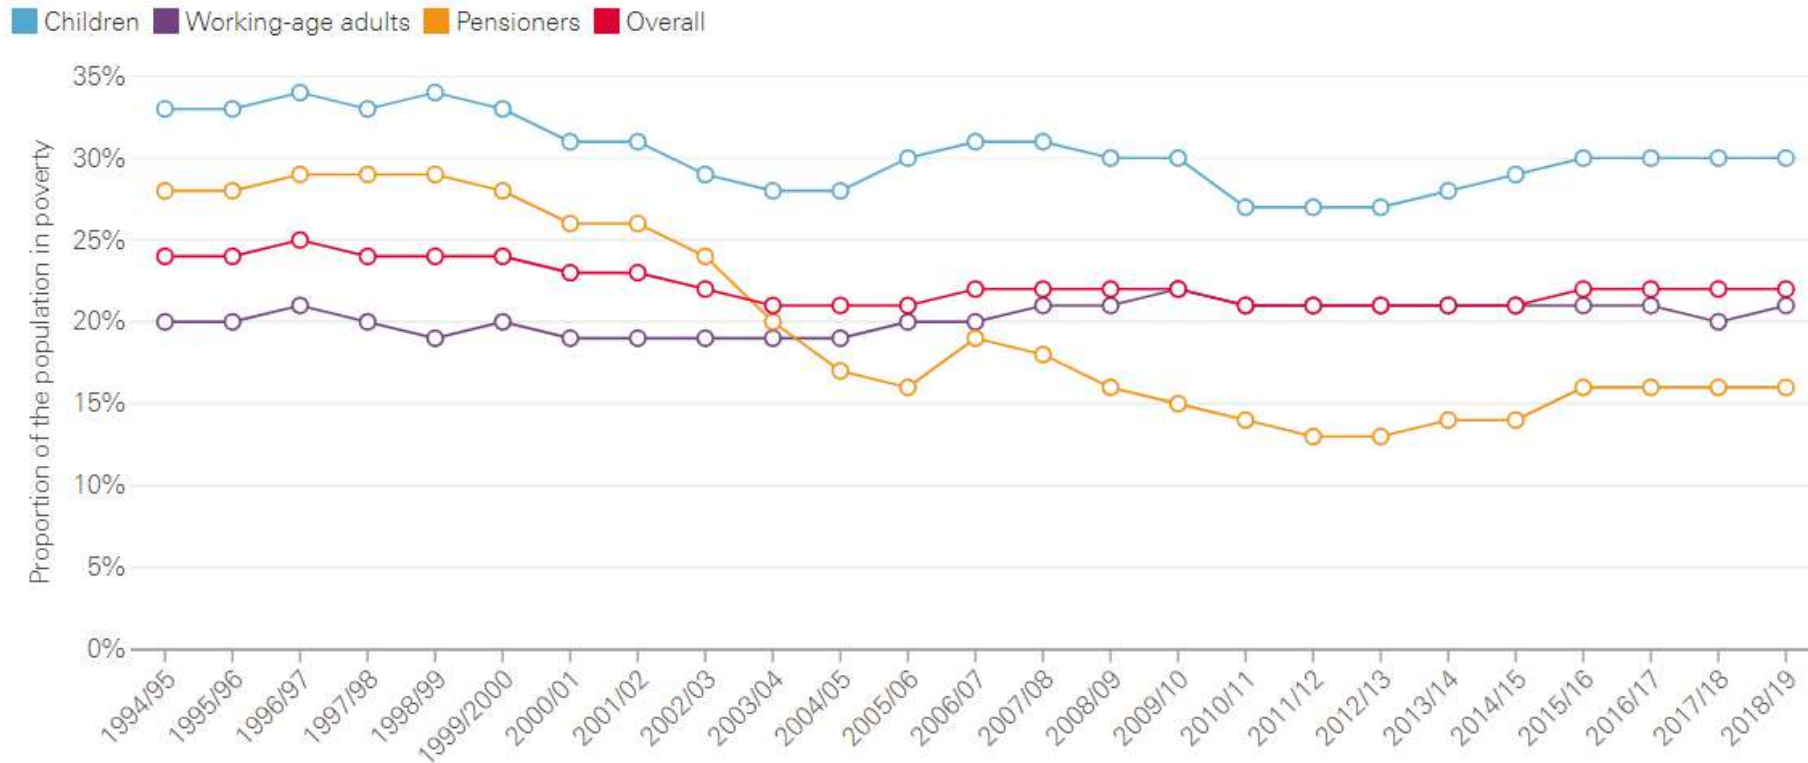

By decile of deprivation, England: 2015-17

Pre-pandemic: economic & social resilience

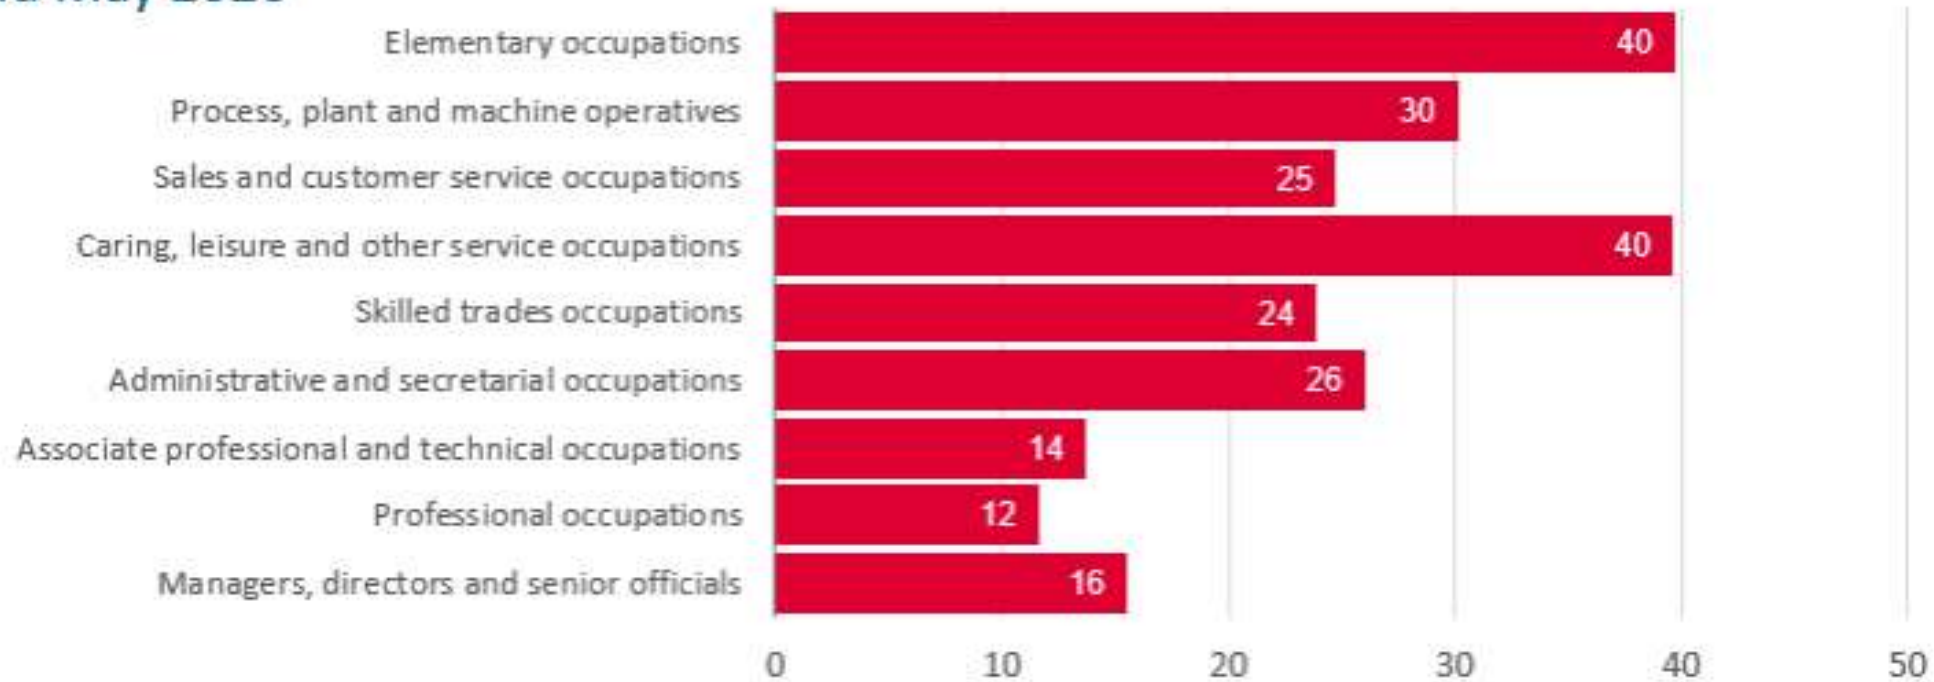

Poverty trends flat in recent years despite employment increases

Poverty rates by household type, % households below 60% of median income AHC: UK, 1994/95–2017/18

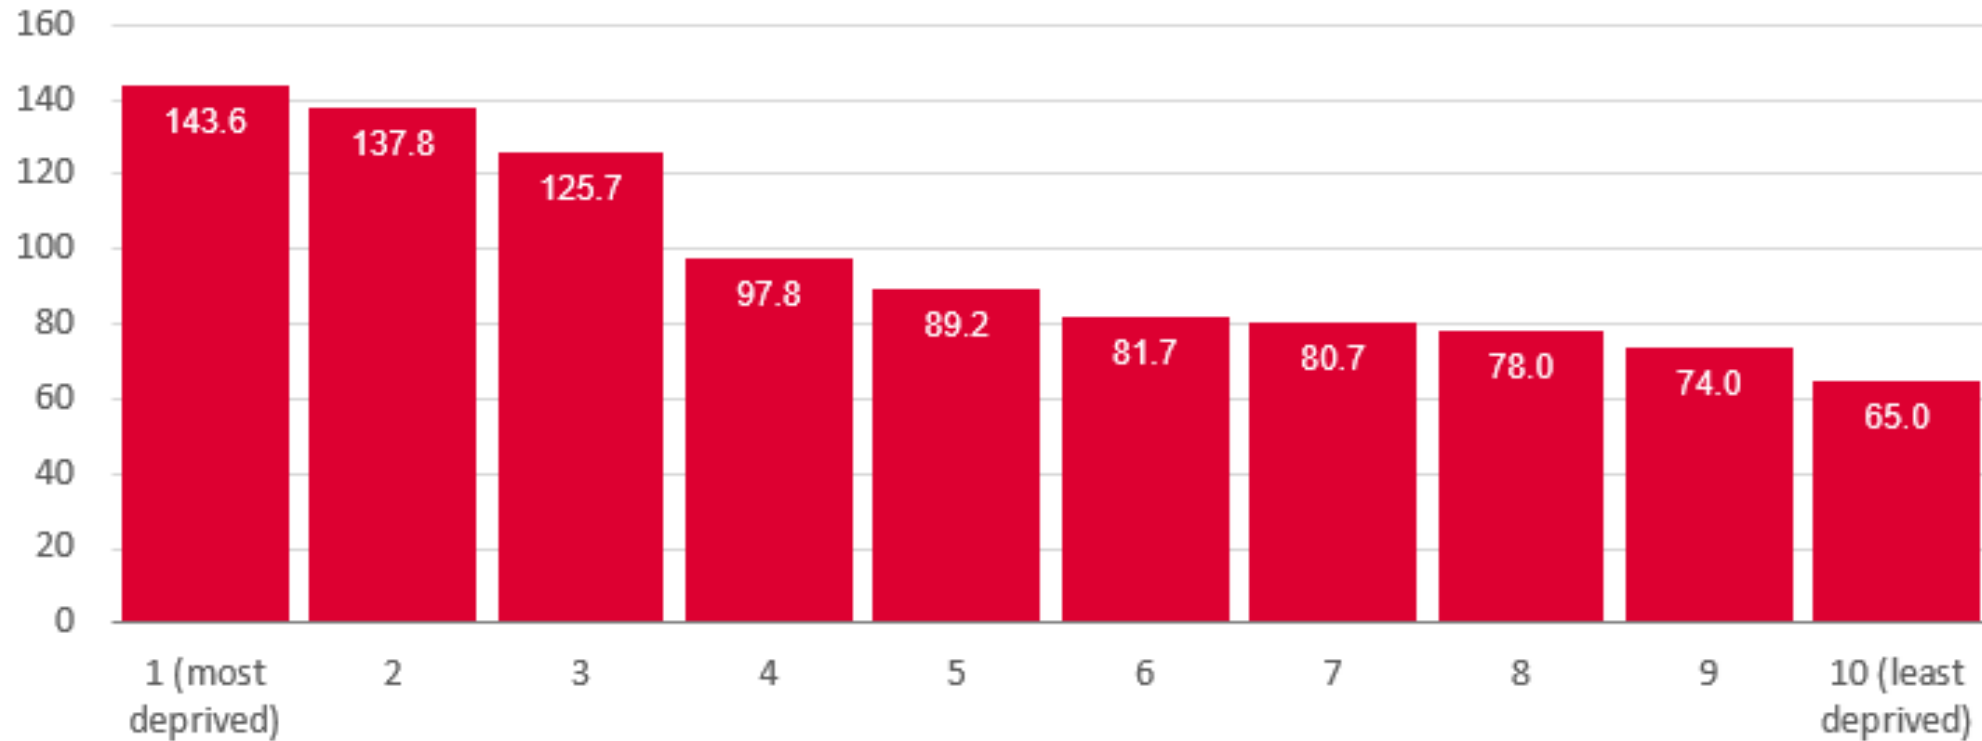

Impact of the pandemic - occupation

Age-standardised mortality rate for men 20-64 per 100,000 for deaths involving COVID-19 in England and Wales between March and May 2020

Impact of the pandemic - deprivation

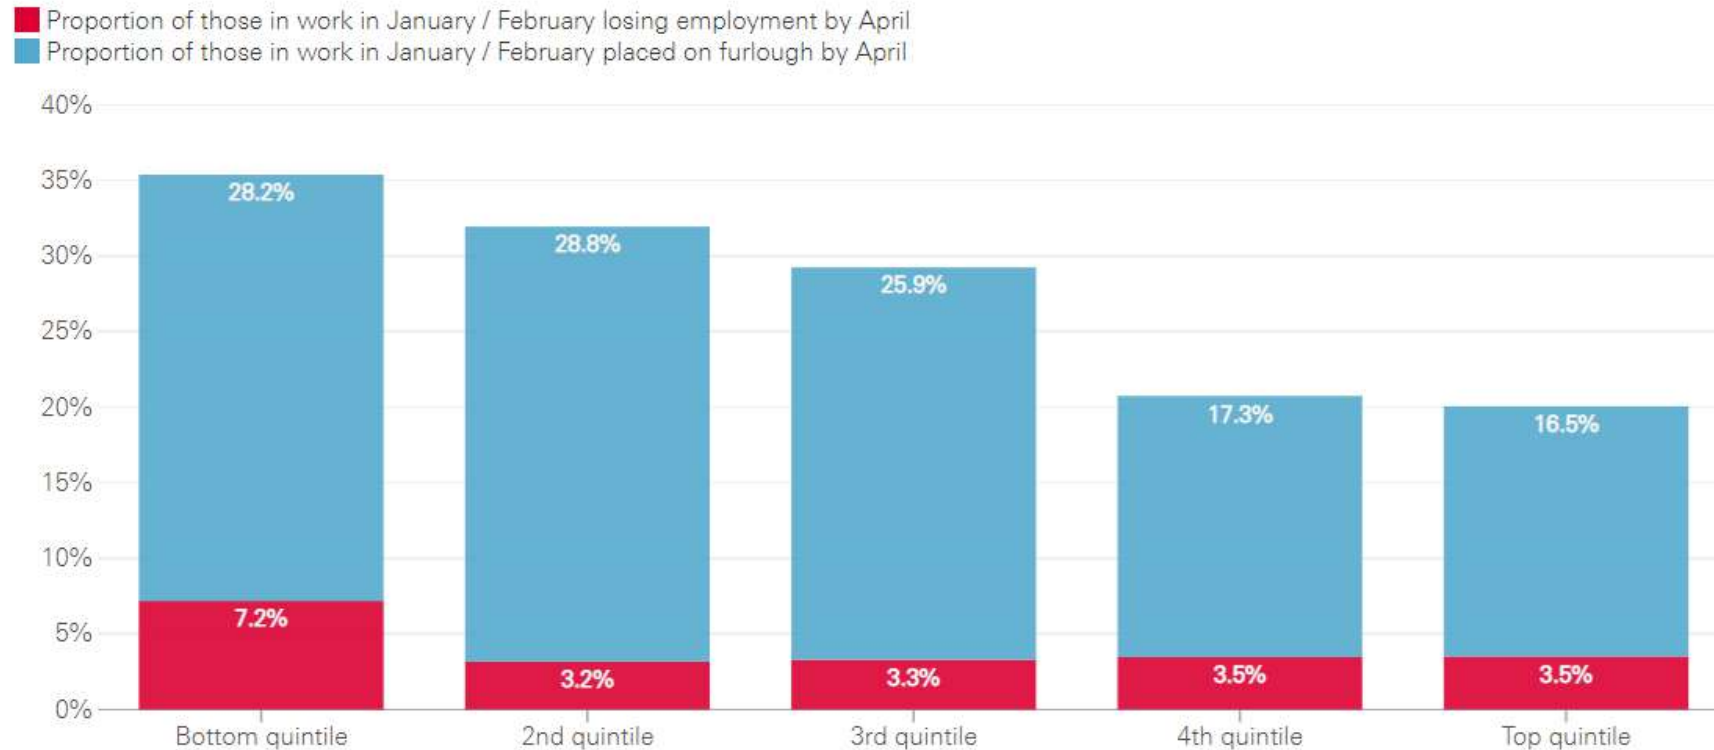

Age-standardised mortality rate per 100,000 for deaths involving COVID-19 in England and Wales between March and July 2020

Impact of the pandemic - employment

Employment impact has been greatest for those previously on the lowest incomes

Changes to employment earnings by income quintile: UK, 2020

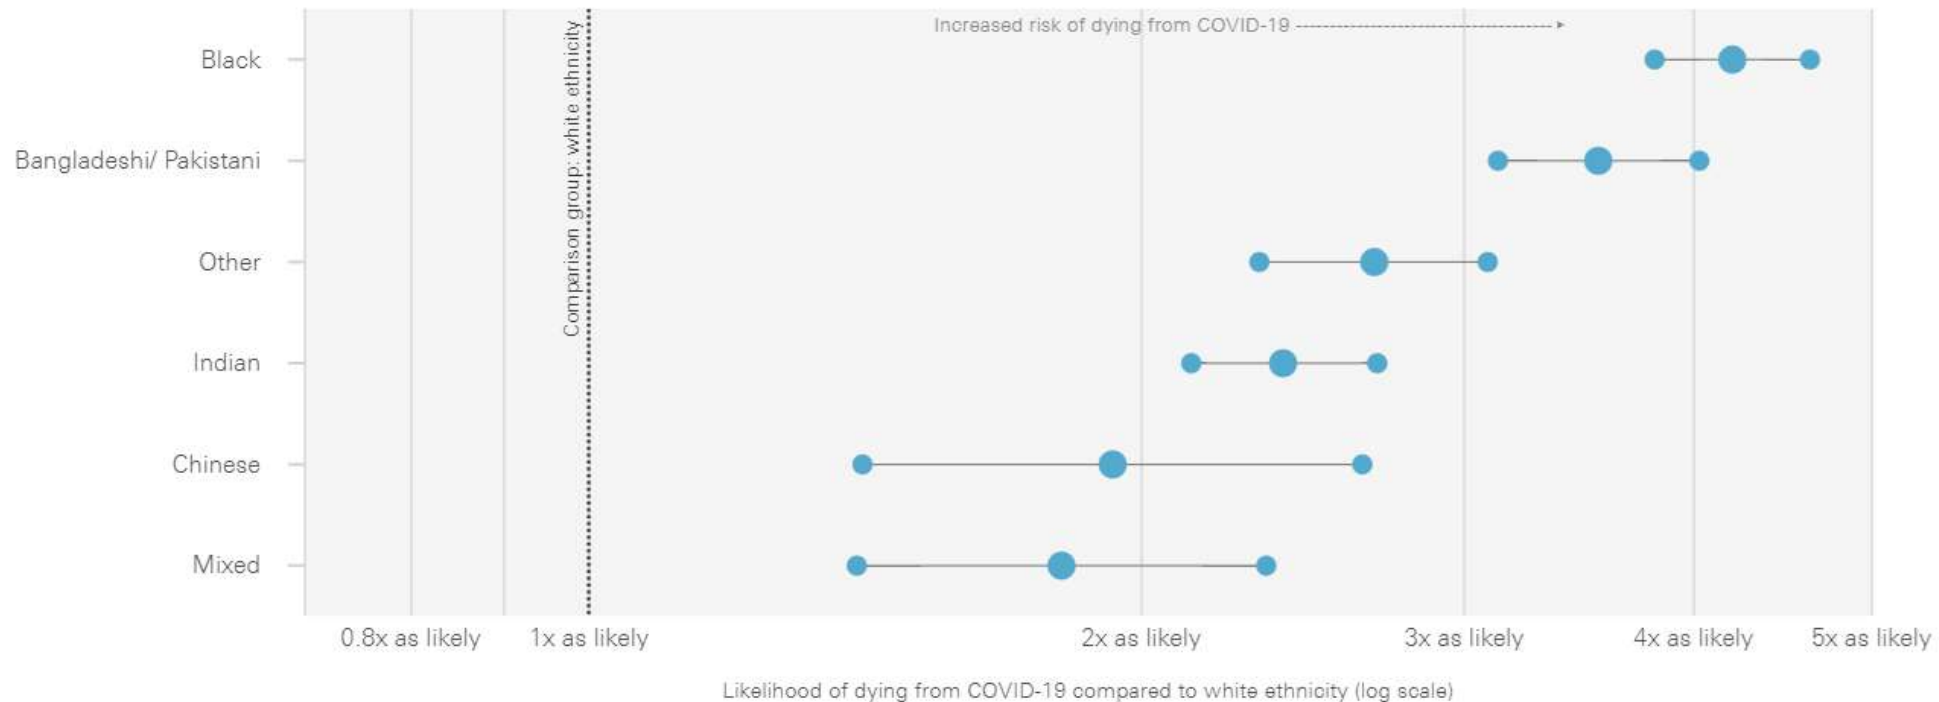

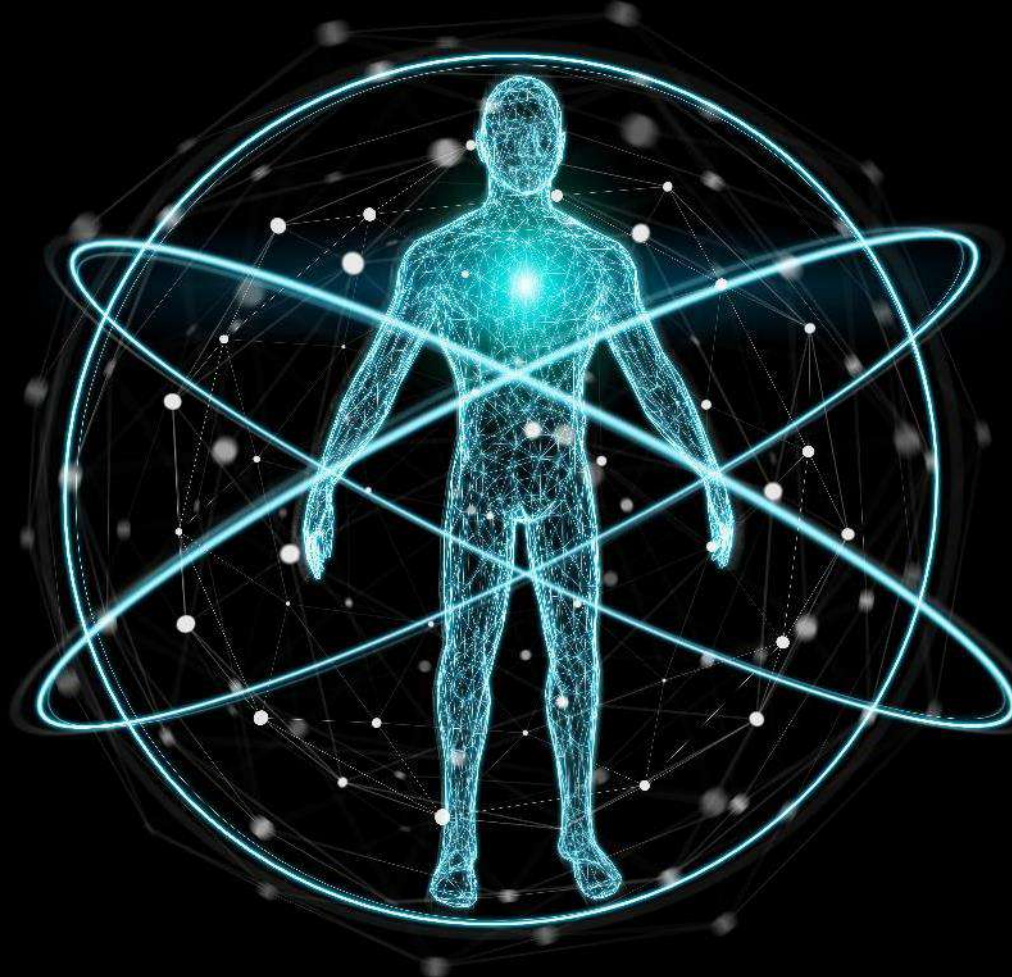

Impact of the pandemic - ethnicity

The risk of COVID-19 related death is more than four times as high for people of black ethnicity than for those of white ethnicity after adjusting for age

Risk of COVID-19-related death by ethnic group and sex, England and Wales, 2 March to 10 April 2020.

THE FUTURE OF HEALTH

Rebuilding economies & tackling inequality in a post covid world

Dr Stephanie Allen

Shifts in Healthcare, accelerating throughout COVID

From	To
Volume	Value
Patient	Customer
Bricks and mortar	IOT
Hospital	Home
Healthcare	Wellness
One size fits all	Personalisation
Compliance	Exemplar
Frailty	Active Ageing
Acute	Chronic
Stable	Disruption

Key considerations

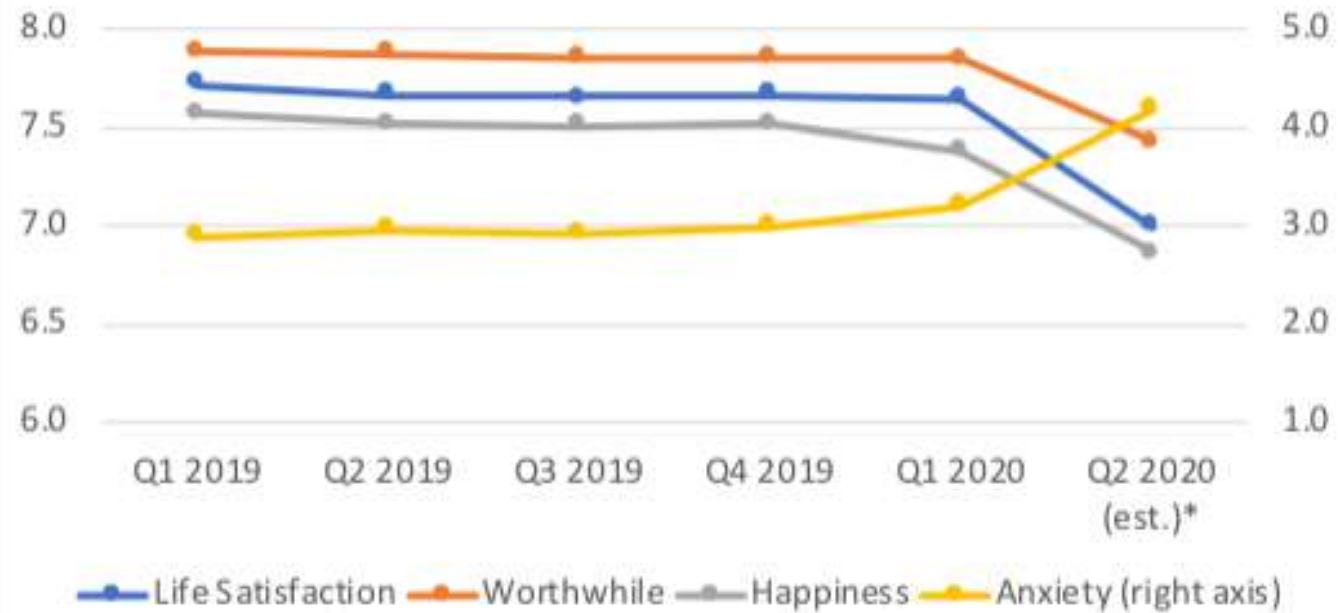

- Public/Private systems
- Health & society 'everybody's business'
- Role of disruptive technology
- Need for an ethical framework

Gus O'Donnell
